

RENEGADE BRIGADE

Warhammer 40,000 · 8th Edition Rules Primer

01 — Unit Profiles

Every unit has a datasheet with a stat line. Here is what each value means:

Stat	Name	Meaning
M	Movement	How far the model moves in inches each turn
WS	Weapon Skill	Roll needed to hit in melee — lower is better
BS	Ballistic Skill	Roll needed to hit with ranged weapons
S	Strength	Compared to target Toughness to determine wounding
T	Toughness	How hard the model is to wound
W	Wounds	Damage capacity before removal
A	Attacks	Melee attacks made in the Fight phase
Ld	Leadership	Used for Morale tests — higher is better
Sv	Save	Roll to ignore wounds — lower is better

Invulnerable Saves (e.g. 4++) cannot be reduced by AP and always work on the listed roll.

02 — The Battle Round

A game is played over Battle Rounds. Each Round has two player turns. At the start of each round both players roll off — highest chooses who goes first.

Phase	Summary
1 — Movement	Move units up to M. Advance adds D6" but restricts shooting and charging.
2 — Psychic	Psykers attempt powers. Opponent may Deny. Smite deals D3 mortal wounds.
3 — Shooting	Eligible units shoot. Roll to hit, wound, save, allocate damage.
4 — Charge	Units within 12" may charge. Roll 2D6 vs distance. Defender fires Overwatch on 6+.
5 — Fight	Charged units fight first, then players alternate. Pile in 3", attack, consolidate 3".
6 — Morale	Units that lost models test Leadership. Fail = additional models flee.

03 — Movement Phase

Action	Effect	Restriction
Normal Move	Move up to M"	Cannot end within 1" of enemy
Advance	Move up to M + D6"	Cannot shoot most weapons or charge this turn
Fall Back	Move up to M" away from combat	Cannot shoot or charge this turn

Unit Coherency: All models must stay within 2" (horizontally) and 6" (vertically) of at least one other model at all times.

Reinforcements arrive at the end of your Movement phase and must be set up within your own deployment zone or within a certain distance of your table edge. They cannot be placed freely in the middle of the battlefield.

Deep Strike is a specific ability listed on a unit's datasheet — only units with this ability can be placed anywhere on the battlefield more than 9" from enemy models. Examples include Terminators, Crisis Suits and Drop Pods. Without Deep Strike, reserve units always arrive from the table edge.

FLY — Units with the Fly keyword move over other models and terrain freely.

04 — Psychic Phase

Psykers manifest powers by rolling 2D6 vs the Warp Charge. Rolling double 1s or double 6s triggers Perils of the Warp (D3 mortal wounds on a 1 or 6). Opponents within 24" may Deny by rolling 2D6 and exceeding the caster's roll.

Smite — Warp Charge 5. Closest visible unit within 18" suffers D3 mortal wounds (D6 on 11+). Each non-Smite power can only be attempted once per turn per army in matched play.

Mortal Wounds bypass all saves. Each deals 1 wound directly. Excess carry over to the next model in the unit.

05 — Shooting Phase

Roll to Hit (vs BS), Roll to Wound (S vs T), Saving Throw (Sv minus AP), allocate Damage. A natural 1 always fails to hit or wound regardless of modifiers.

Strength vs Toughness	Roll to Wound
S is double T or more ($S \geq 2 \times T$)	2+
S greater than T	3+
S equals T	4+
S lower than T	5+
S is half T or less ($S \leq T/2$)	6+

AP (Armour Penetration) subtracts from the target's saving throw. AP-2 turns a 3+ save into a 5+ save. Invulnerable saves are never affected by AP.

Cover — Add +1 to saving throws for Infantry partially obscured by terrain. No effect on Mortal Wounds.

06 — Charge Phase

Declare a charge against any enemy within 12". Roll 2D6 — must equal or exceed the distance to get within 1" of all targets. Defender fires Overwatch first (hits only on 6). A failed charge does not move the unit.

Heroic Intervention: After charges, enemy Characters within 3" may move up to 3" to get within 1" of the charging unit.

07 — Fight Phase

Units that charged fight first. Then players alternate. Each unit: (1) Pile In up to 3" toward nearest enemy, (2) Make Attacks (WS to hit, then wound, save, damage), (3) Consolidate up to 3" toward nearest enemy.

Counter-offensive — Spend 2CP to fight with one of your units immediately after an enemy unit fights.

08 — Morale Phase

Units that lost models this turn test Morale: roll D6 + number of models lost. If the result exceeds Leadership, that many additional models flee. Spend 2CP on Insane Bravery to auto-pass one test.

09 — Weapon Types

Type	Rules
Rapid Fire	Double shots within half range
Heavy	-1 to hit if the bearer moved this turn
Assault	Can fire after Advancing at -1 to hit. Can fire on a charge turn.
Pistol	Fires within 1" of enemy. Must target closest enemy.
Grenade	One per unit in Shooting phase.
Melee	Used only in Fight phase. Range 1".

10 — Detachments & Command Points

Armies use Detachments. Start with 3 CP plus Detachment bonuses.

Detachment	HQ	Troops	Elites	Fast	Heavy	CP
Battalion	2	3-6	0-6	0-3	0-3	+5
Brigade	3-5	6-12	3-8	3-8	3-8	+9
Patrol	1-2	1-3	0-2	0-2	0-2	+0
Spearhead	1-2	0-3	0-3	0-3	3+	+1
Outrider	1-2	0-3	0-3	3+	0-3	+1
Vanguard	1-2	0-3	3+	0-3	0-3	+1

11 — Keywords

Keywords are referenced by rules — any unit with that keyword is affected. Bracket keywords like <CHAPTER> are replaced by your sub-faction name.

Keyword	Effect
CHARACTER	Cannot be targeted if a non-CHARACTER closer unit has more models (unless 10+ Wounds)
VEHICLE	No Morale tests. Degrading stat profile as wounds are lost.
TITANIC	Never takes Morale. Can fire all weapons after moving.

FLY	Moves over terrain and models freely. Can Fall Back and still shoot.
PSYKER	Can manifest psychic powers and attempt to Deny the Witch.

Re-rolls — Always applied before modifiers. A die can only ever be re-rolled once.
