

RENEGADE BRIGADE

Warhammer 40,000 · 8th Edition Rules Primer

01 — Unit Profiles

Every unit has a datasheet with a stat line. Here is what each value means:

Stat	Name	Meaning
M	Movement	How far the model moves in inches each turn
WS	Weapon Skill	Roll needed to hit in melee — lower is better (3+ hits on 3,4,5,6)
BS	Ballistic Skill	Roll needed to hit with ranged weapons
S	Strength	Compared against Toughness to determine wounding
T	Toughness	How hard the model is to wound
W	Wounds	Damage capacity before removal
A	Attacks	Melee attacks made in the Fight phase
Ld	Leadership	Used for Morale tests — higher is better
Sv	Save	Roll to ignore wounds — lower is better

Invulnerable Saves (e.g. 4++) cannot be reduced by Armour Penetration and always work on the listed roll.

02 — The Battle Round

A game is played over Battle Rounds. Each Round has two player turns. At the start of each round both players roll off — highest chooses who goes first. Each player turn has 6 phases:

Phase	Summary
1 — Movement	Move units up to their M value. Advance adds D6" but restricts shooting and charging.
2 — Psychic	Psykers attempt powers. Opponent may Deny. Smite always deals D3 mortal wounds.
3 — Shooting	Eligible units shoot at enemy. Roll to hit, wound, save, allocate damage.
4 — Charge	Units within 12" of enemy may charge. Roll 2D6 vs distance. Defender fires Overwatch on 6s.
5 — Fight	Charged units fight first, then players alternate. Models pile in 3", attack, consolidate 3".
6 — Morale	Units that lost models test Leadership. Fail = additional models flee.

03 — Movement Phase

Action	Effect	Restriction
Normal Move	Move up to M"	Cannot end within 1" of enemy
Advance	Move up to M + D6"	Cannot shoot most weapons or charge this turn
Fall Back	Move up to M" away from combat	Cannot shoot or charge this turn

Unit Coherency: All models must stay within 2" (horizontally) and 6" (vertically) of at least one other model in the unit at all times.

FLY — Units with the Fly keyword move over models and terrain freely.

04 — Psychic Phase

Psykers manifest powers by rolling 2D6 vs the power's Warp Charge. Doubles trigger Perils of the Warp (D3 mortal wounds on a 1 or 6). Opponents may Deny by rolling 2D6 — exceeding the caster's roll negates the power.

Smite — Warp Charge 5. Closest visible unit within 18" suffers D3 mortal wounds (D6 on a result of 11+).

Mortal Wounds bypass all saves. Each deals 1 wound directly. Excess carry over to the next model in the unit.

05 — Shooting Phase

Roll to Hit (vs BS), then Roll to Wound (S vs T), then Saving Throw (vs Sv minus AP), then allocate Damage. A 1 always fails to hit or wound.

Strength vs Toughness	Roll to Wound
S is double T or more	2+
S greater than T	3+
S equals T	4+
S lower than T	5+
S is half T or less	6+

Armour Penetration (AP) subtracts from the target's saving throw. AP-2 means the target saves at -2 (e.g. a 3+ save becomes a 5+). Invulnerable saves are unaffected by AP.

Cover — Add +1 to saving throws for Infantry in cover. No effect on Mortal Wounds or Invulnerable Saves.

06 — Charge Phase

Declare a charge against any enemy unit within 12". Roll 2D6 — must meet or exceed the distance to get within 1" of all targets. Defender fires Overwatch first (only hits on 6). A failed charge does not move the unit.

Heroic Intervention: After charges, enemy Characters within 3" may move up to 3" to get within 1" of the charging unit.

07 — Fight Phase

Units that charged fight first. Then players alternate picking units to fight. Each unit: (1) Pile In up to 3" toward nearest enemy, (2) Make Attacks (roll to hit with WS, wound, save, damage), (3) Consolidate up to 3" toward nearest enemy.

Counter-offensive — Spend 2CP to fight with one of your units immediately after an enemy unit fights.

08 — Morale Phase

Any unit that lost models this turn tests Morale. Roll D6 + number of models lost. If the result exceeds Leadership, that many additional models flee.

Spend 2CP on **Insane Bravery** to auto-pass one Morale test.

09 — Weapon Types

Type	Rules
Rapid Fire	Fires twice the shots within half range
Heavy	-1 to hit if the bearer moved this turn
Assault	Can fire after Advancing at -1 to hit. Can fire on a charge turn.
Pistol	Fires even when within 1" of enemy. Must target closest enemy.
Grenade	One per unit in Shooting phase. Uses thrower's BS.
Melee	Used only in Fight phase. Range is 1".

10 — Detachments & Command Points

Armies in Matched Play use Detachments. Each Detachment earns Command Points (CP) if its slot requirements are met. Start with 3 CP plus Detachment bonuses.

Detachment	HQ	Troops	Elites	Fast	Heavy	CP
Battalion	2	3–6	0–6	0–3	0–3	+5
Brigade	3–5	6–12	3–8	3–8	3–8	+9
Patrol	1–2	1–3	0–2	0–2	0–2	+0
Spearhead	1–2	0–3	0–3	0–3	3+	+1
Outrider	1–2	0–3	0–3	3+	0–3	+1
Vanguard	1–2	0–3	3+	0–3	0–3	+1

11 — Keywords

Keywords are referenced by rules — a rule that affects INFANTRY applies to any unit with that keyword. Bracket keywords like are placeholders replaced by your chosen sub-faction.

Keyword	Effect
CHARACTER	Cannot be targeted if a non-CHARACTER closer unit has more models (unless 10+ Wounds)
VEHICLE	No Morale tests. Degrading stat profile as wounds are lost.
TITANIC	Never takes Morale. Can fire all weapons after moving.
FLY	Moves over terrain and models freely. Can Fall Back and shoot.
PSYKER	Can manifest psychic powers and Deny the Witch.

Re-rolls — Always applied before modifiers. A die can only be re-rolled once regardless of how many sources of re-rolls apply.
